On the rural back roads of America, far from the big city you'll find **The Men of Bucks County**. These are young, All-American guys, who deeply care about one another and their tight-knit community. Athletic and virile, they work hard, but they know how to let go and have fun by sharing intimate and intense moments with each other. Their spontaneous, care-free sexual attitude is a testament to their simple-life surroundings and their need for release. This rural innocence and lusty desire fosters their fiery camaraderie, creating a brotherhood of sexually liberated studs who wile away the days frolicking naked in the sun and exchanging pleasures. Take a trip to Bucks County, and you'll find a place rich with Americana, charged with youthful energy and filled with peace and quiet that is only disrupted by the erotic shenanigans of these twelve handsome men!
